About Corporate Renaissance Group

At Corporate Renaissance Group (CRGroup), we have been providing innovative business solutions and expert consulting services since 1989. As a member of the Microsoft Partner Network, we apply Microsoft technologies to help companies increase efficiencies and improve financial and operational performance. We brought the original Changer, Re-Formatter and QuickCubes to the Microsoft Dynamics™ GP world in the 90's. Since then, our portfolio for all Dynamics users has expanded to include CRG emPerform; award-winning online talent management for GP & AX, data-automation add-ons for GP, collaborative budgeting, costing and BI solutions for all Dynamics ERP and trend-analysis for Dynamics CRM.

CRGroup Add-Ons for Dynamics GP

Developed using our 27 years of software development experience and years of expertise implementing and maintaining Dynamics Solutions, CRGroup Add-Ons offer easy-to-use functionality to help users extend the reach of their Dynamics Solution.
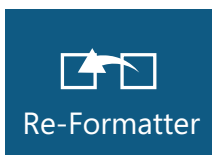

CRGroup offers easy-to-use Add-Ons to help with common challenges faced by Dynamics GP™ users:

▶ Have you outgrown your current chart of accounts?
▶ Want to maximize your Analytical Accounting investment?
▶ Need to combine multiple companies in Dynamics GP?
▶ Want to enhance your Dynamics HR Module?
▶ Need an easy way to extract trends from your data?

Microsoft Dynamics™

Changer
Change and Merge User-Defined IDs and Data:
CRG Changer(CfMD) allows you to merge, change and combine GL accounts, Vendor IDs, item numbers, Customer IDs, project numbers and contract numbers for all current and historical transactions. Changer will update data from many non-core Microsoft Dynamics GP modules and third party applications.

Re-Formatter
Easily Re-Format your Account Framework:
Re-Formatter is the only tool available that allows you to re-format your Dynamics GP account framework after the initial installation. With Re-Formatter, you can reclaim control of your account framework and easily modify the maximum account length, segment size, number of segments, and sorting options. Re-Formatter supports all Dynamics GP Modules, including third party Add-Ons!

AA Tools
Maximize your Dynamics GP Analytical Accounting Investment:
AA Segment Converter allows you to convert GL account segment values to AA dimension codes in a snap and AA Backfiller will save you time by reducing the number of AA dimension and code assignments that are needed during transaction entry.

Company Combiner
Combine Microsoft Dynamics GP Companies:
Easily change your Dynamics GP Setup and combine multiple companies with the same chart of accounts into a single company. Report and analyze the data on each of the original companies as well as the combined company. CRGroup offers complete services to help ensure success with this Add-On.

Quick Cubes
Transform Data Into Information:
Easy-to-use, pre-built SQL Analysis Services cubes that deliver analysis-ready data. Access data from the General Ledger, Accounts Payable, Accounts Receivable, Inventory, Sales and Project Accounting. In addition to extracting information from Microsoft Dynamics GP, data from other sources can be loaded into the data warehouse. The data in QuickCubes is refreshed on a schedule that suits your business requirements.

Why do Dynamics Users ♥ CRGroup?

"I love CRGroup because, as a small customer, they always have a solution to meet my budget and they always make it feel like you're working with a friend."

Ken Cousineau, Executive Director
– Canadian Golf Superintendents Association

"I love CRGroup because they value relationships with their partners and customers and provide well-conceived, strategic products that help customers meet their business objectives."

Jeff Smith, Solutions Architect
– Socius

Costing & Allocations
Explore CRGroup products for costing & allocations.

Cost Allocator
Cost Allocator(CfMD): Perform Multi-Level, Step-Down Cost Allocations
CRG Cost Allocator performs multi-level cost allocations by percentage, value or cost drivers to determine the true costs and profitability. A full audit trail is provided to track the origin of costs. Using a seamless interface to Microsoft Dynamics GP, Cost Allocator effortlessly extracts the financial data, performs detailed cost allocations, then populates the data back into Microsoft Dynamics GP as a "Budget ID" or an unposted batch of journal entries. Users can now monitor overheads against budgets right at the departmental account level.

CERTIFIED FOR Microsoft Dynamics™ GP

FlexABM
FlexABM: Complete Activity-Based Costing/Management (ABC/M)
FlexABM is a proven, easy-to-use, enterprise-wide Activity-Based Costing/Management (ABC/M) solution that identifies the true cost of all activities and provides decision makers with the analytical tools, models, and methodologies to effectively evaluate business processes. FlexABM's unique ability to perform full reciprocal costing, advanced data modeling, and dynamic reporting makes it the complete ABC/M solution. With a low cost of ownership and effortless implementation, FlexABM provides the quickest possible return on your ABC/M investment.
