

CRG Changer

Get more from your investment in
Microsoft Dynamics GP™

CRG Changer™ allows you to change, merge and combine your codes and data in Dynamics GP, ensuring your business management system operates at optimum efficiency.

CRG Changer

Changer efficiently enables the modification and consolidation of Microsoft Dynamics GP.

Developed to meet the needs of Microsoft Dynamics GP customers, CRG Changer efficiently enables the modification and consolidation of Microsoft Dynamics GP data. Changer easily changes and merges general ledger accounts, vendor IDs, employee IDs, item numbers, customer IDs, project numbers and contract numbers for all current and historical transactions.

- All the changes made by Changer affect all current and historical transactions
- All data is modified, leaving no visible trace of the original code
- Drill downs, balances and reports will treat the modified information as if it had been posted to the new accounts or codes from the beginning

Dynamics Functionality:

General Ledger (Changer GL)

Change or consolidate general ledger account numbers. With Changer, you can choose to transfer the transactions of one account to another after a specific date.

Receivables Management (Changer RM)

Change customer identification numbers to an existing or new customer ID.

Payables Management (Changer PM)

Change vendor identification numbers to an existing or new vendor ID.

Inventory (Changer IV)

Change and merge item numbers.

Payroll (Changer PR)

Change employee IDs.

Project Accounting (PA)

Change project numbers and contract numbers.

Using Third-Party Applications or other Dynamics GP Modules? CRG Changer has you covered!

In addition to all the Microsoft Dynamics GP modules, Changer will update data from the following third party applications:

- MICR from Mekorma
- HRMSS from Integrity Data
- Job Cost from WennSoft
- Service Management from WennSoft
- Diamond Software (GL Changer Only)
- Horizons Manufacturing Suite
- Extender from eOne Integrated Business Solutions
- Project Cost (Olympic Systems) (GL Changer only)
- Multi-Entity Management from Binary Stream

Changer can modify and consolidate the following current and historical Microsoft Dynamics GP data:

- Account Numbers
- Customer Numbers
- Vendor ID Numbers
- Item Numbers
- Employee ID Numbers
- Project Numbers
- Contract Numbers
