BUSINESS INTELLIGENCE FOR MICROSOFT DYNAMICS

THE INSTANT ADVANTAGE OF UNBEATABLE CONTENT

Disrupting data transformation, reporting & intelligence in Dynamics

OUR TOP 30 POWER BI DASHBOARDS FOR DYNAMICS

✓ Dynamics NAV

✓ Dynamics 365 Business Central

✓ Dynamics AX✓ Dynamics F&O

biadynamics

Ready-to-use Business Intelligence solution built on 15 years of BI and Microsoft Dynamics experience and over 1000+ projects worldwide. BI4Dynamics automatically generates a Data Warehouse with

1507/2107 measures 147/171 dimensions from **179/185** Dynamics tables

BI4Dynamics brings you up to speed with plug-and-play **Power BI** and **Excel dashboards** so that you can start analyzing your data, from whatever device you prefer.

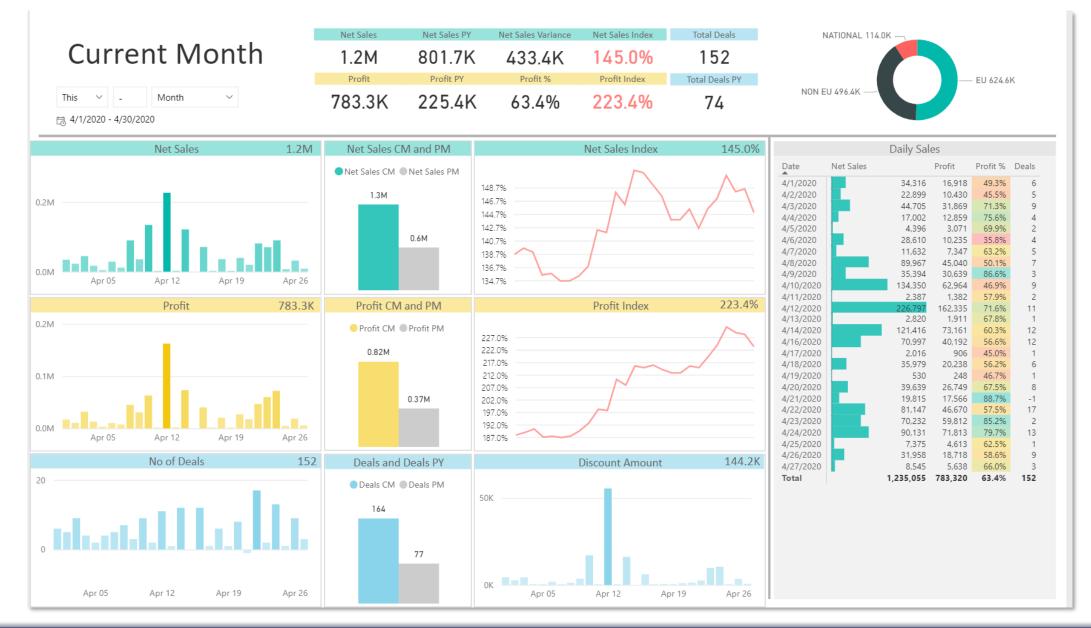

42 Dimensions

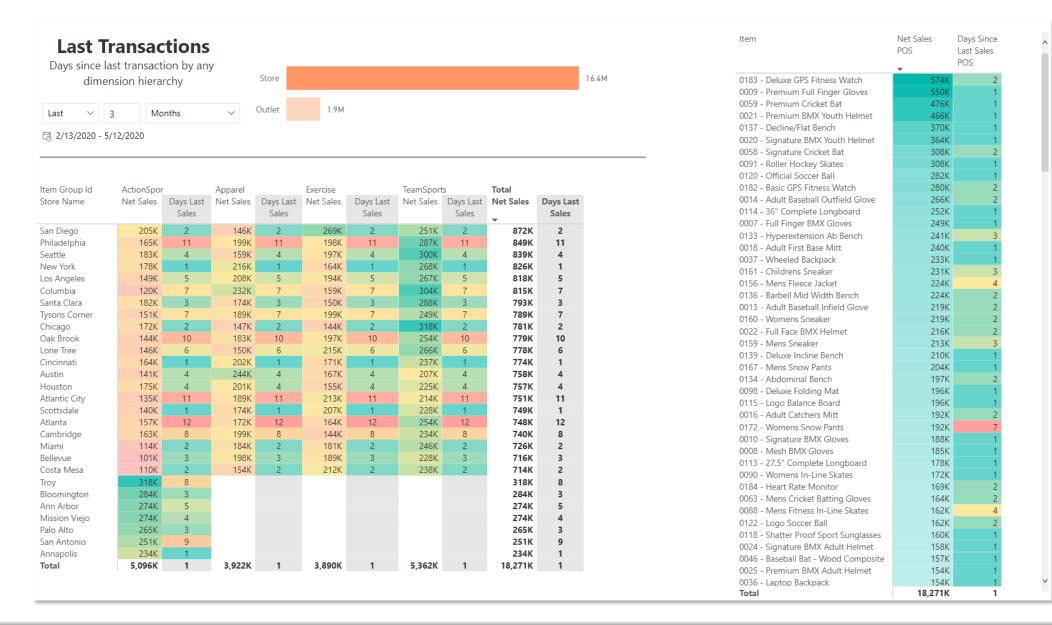

SALES

The sales cube comes with **253 measures.** Measure groups are sharing **42 dimensions** with **476 attributes** in **71 hierarchies**.

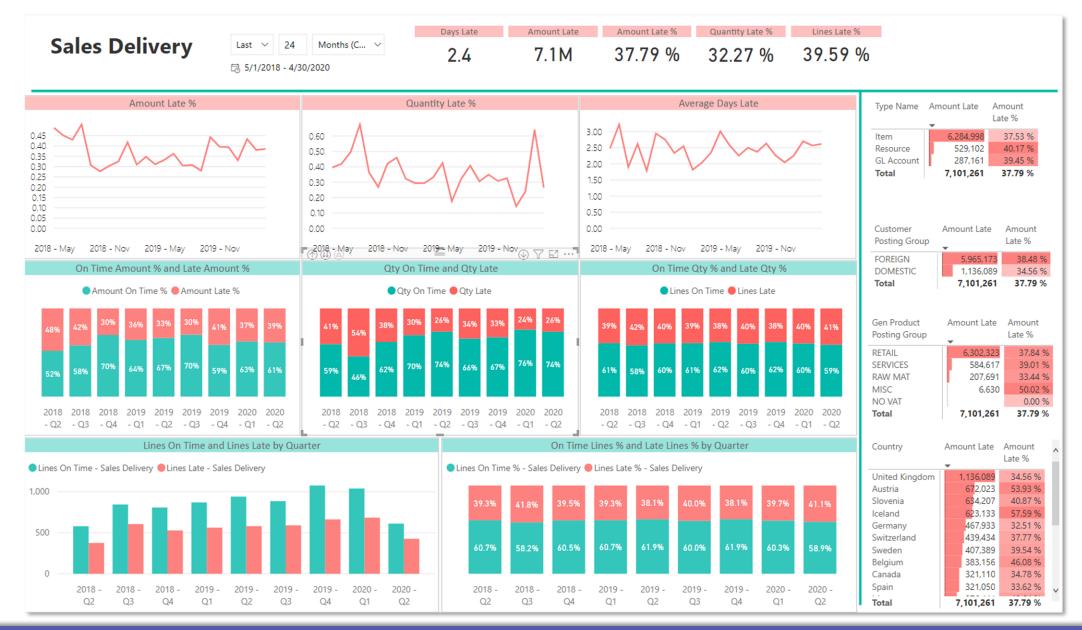

Sales Values: We have it all. Analyze sales and profit (Gross / Net Sales, Costs, Discounts, Profits, Invoiced Quantities, Charges, Average Sales/Cost/Profit) from posted sales and service transactions with strongly supported time intelligence (YTD, YoY, PoP, 12 Last months, Rolling 3/6/12) and Expected values (Net Sales, Profit, Cost) coming from Value Entry. There are 81 measures in ACY (additional currency for reporting is selected from Currency table) for consolidation and 8 measures in Posted currency. Follow Last Sales Transactions by any dimension or hierarchy to gain insight when customers are changing their buying habits.

Days Since Last Transaction will help you recognize changes in custromer habits from the get go. If the customer stops buying an item or changes their assortment, you will know – even if your sales values don't change.

Track the delivery performance (**Amount Late%, Days Late**) of your organization during customer fulfilment. Days Late: The difference between the Delivery Date (Promised, Requested or Planned) and Posting Date of Shipment.

Mobile dashboards for Power BI are available for standard application areas such as Sales, Purchase, Inventory, Receivables, Payables and Finances. Selected data can be refreshed every few seconds, meaning you won't miss a beat.

84 Measures

PURCHASE

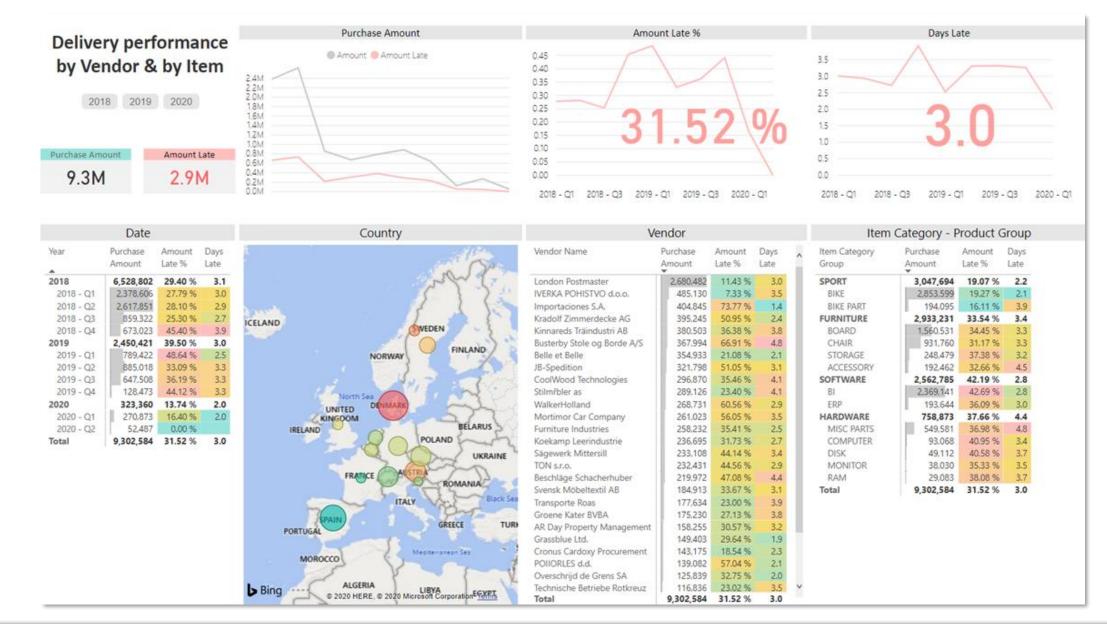

The Purchase cube comes with 84 measures organized in seven measure groups:

Purchase Values: Analyze the cost of Items, GL postings (services), Charges and Fixed Assets (Cost amount, Discount, Quantity, Price, Last purchase transactions) from standard invoiced transactions as well as from specific NAV information like Cost Amount Expected.

Purchase Orders. Analyze purchase documents (Quote, Order, Blanket Order, Return order, Invoice, and Credit memo) by any measure or dimension available in Purchase Header or Purchase Line.

Purchase Order Archive: Analyze archive of purchase documents long after these have been changed, posted or deleted (standard BC functionality to track all changes) by any measure or dimension available in Purchase Order Archive or Purchase Line Archive, additionally to Last archive in a day and Last archive in a month. With simple change in BC, you can analyze your orders that are also posted immediately after creation. This is very useful for companies with long delivery cycles.

Get the information your vendors don't have and track vendor delivery performance (**Amount Late%, Days Late ...**). Days Late is the difference between the Delivery Date (Promised, Requested or Planned) and Posting Date of Receipt.

Days Late is calculated as weighted average, based on the Purchase Amount.

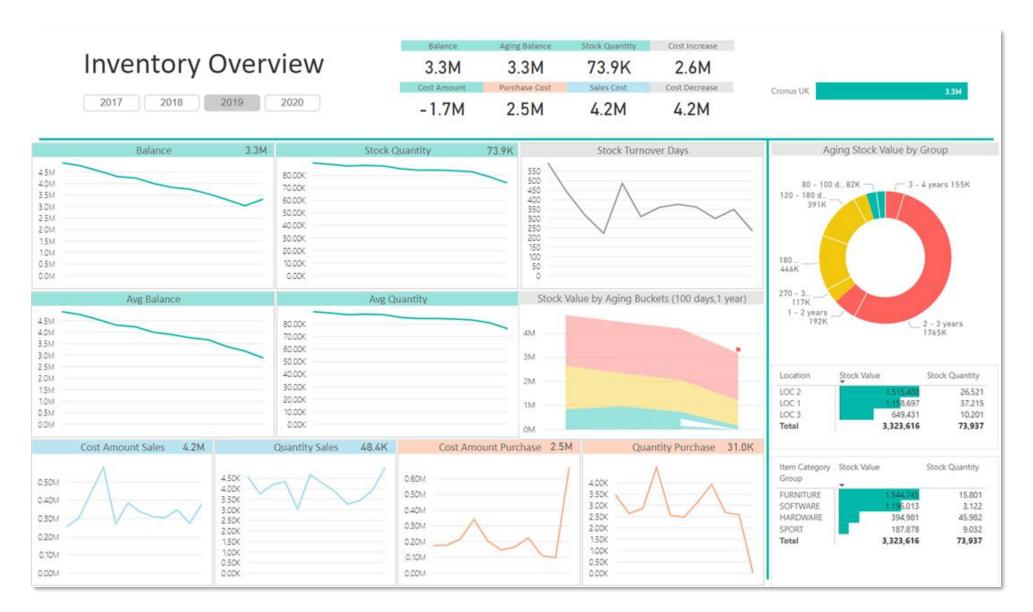

124 Measures

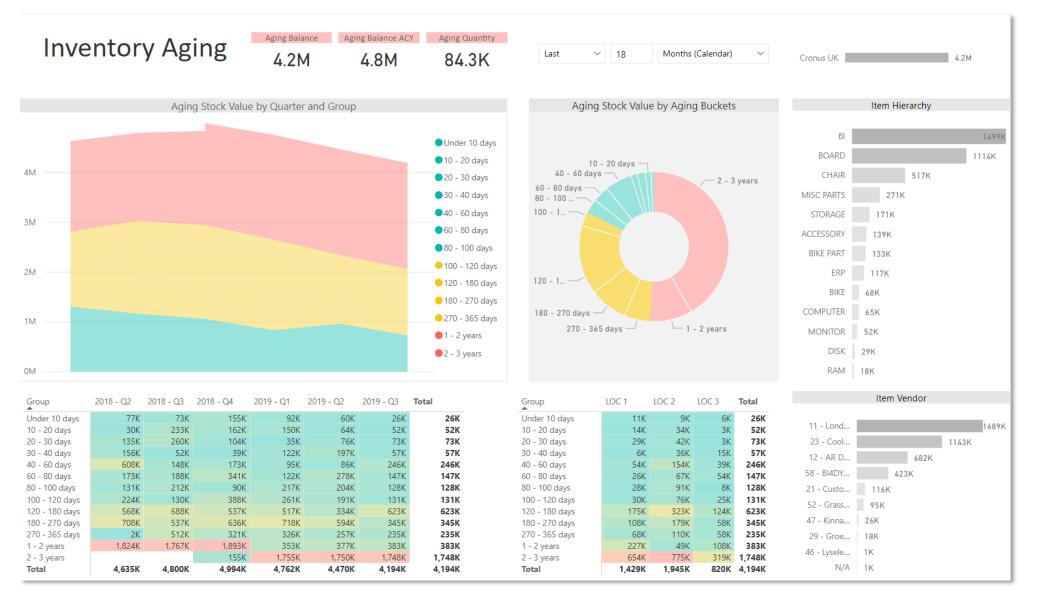

The inventory cube comes with **124 measures**, organized into four measure groups:

- **Inventory Invoiced Transactions**: analyze Cost and Quantity (Amount, Increase, Decrease) by Entry type (in multiple variants of measure), Average costs and Expected values (Posted to GL or Inventory Cost).
- Inventory Shipped Transactions: analyze Cost and Quantity (Amount, Increase,
- **Inventory State**: track the dynamics of your Inventory (Opening / Closing Qty., Balance, Stock Rotation in days, Min / Max Values, Average Qty and Value over time).
- **Inventory Aging**: track Aging value and quantity from first BC transactions with all the changes over time through detailed aging buckets.

Measure groups are sharing 18 dimensions with 174 attributes in 16 hierarchies.

Aging Days measure tells how many days items have not been moving from last location.

Diadynamics RECEIVABLES

Receivables are the most standardized business area, and the cube comes with **40 measures** organized in two measure groups:

Receivables Transactions: get insight into customer transactions (with standard Debit, Credit, Net change and Payment terms) and as weighted average, as well as some specific measures such as Sales on Credit, amount, and percentage.

Receivables State: Analyze balances that are calculated daily for every open document (Opening, Closing, Average, Due and Overdue, Overdue %). Track customer payment habits starting from Payment Terms to Average Open Days and Average Overdue Days – all 3 measures are calculated as weighted averages. Setup and compress data on a weekly or monthly level to gain loading time and save disk space.

Measure groups are sharing 9 dimensions with 227 attributes in 34 hierarchies.

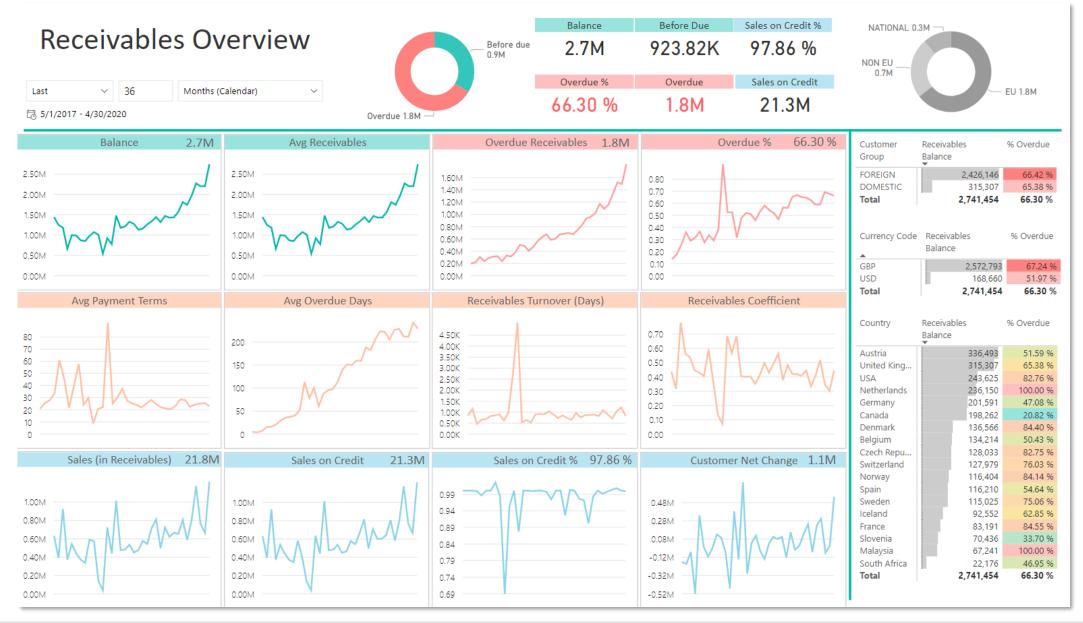

& PAYABLES (USES SAME REPORT LAYOUT)

The payables cube comes with **40 measures** organized in two measure groups:

Payables State to analyze vendor payment habits (Payment Term / Open / Overdue Days – all measures **calculated as weighted averages**), Days Payables Outstanding and Payable Coefficient. Balances are calculated daily for every open document, with the option to compress on a weekly or monthly level for prior periods (to gain performance and save disk space).

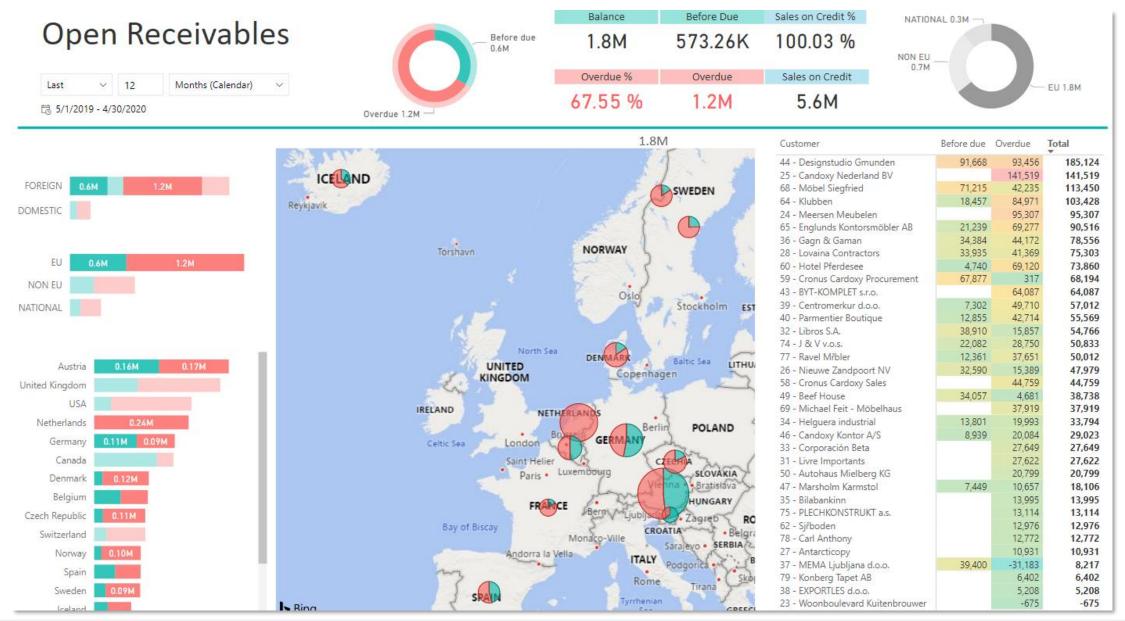

Vendor Analysis" to get insight into vendor transactions with specific measures Purchase on Credit as amount and percentage).

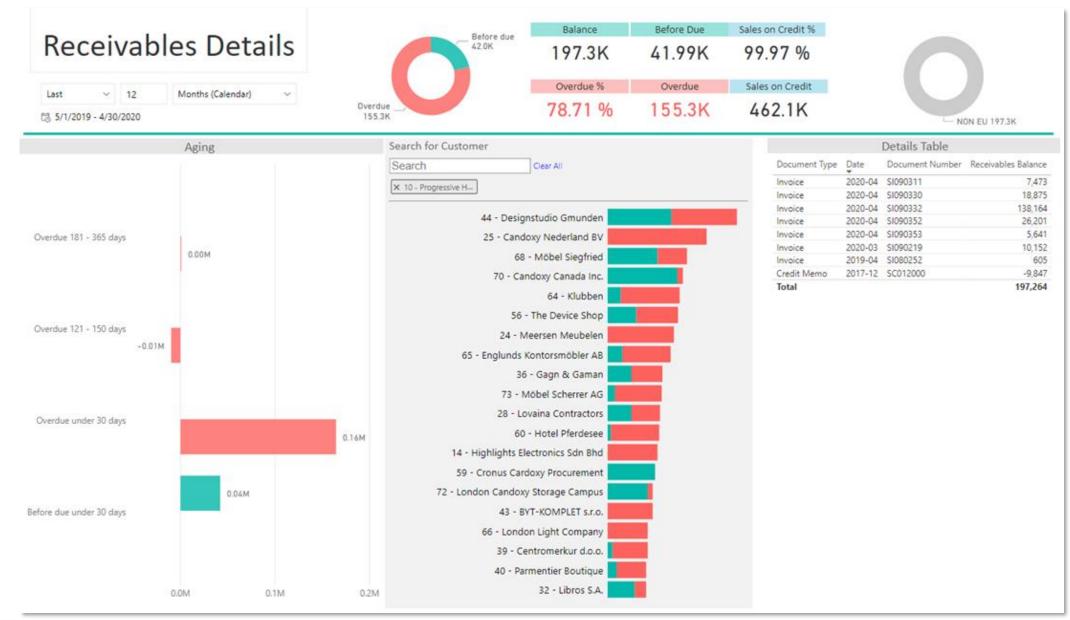

Measure groups are sharing 9 dimensions with 125 attributes within 20 hierarchies.

The measures 'Payment Terms and Overdue Days' are calculated as weighted averages, based on the Net Customer Amount.

FINANCE

The finance cube comes with 179 measures, organized in 6 measure groups:

Account Schedules: Transform your static Account Schedules from BC to BI, combine it with any standard BI dimension or any 20 global BC dimension and get flexibility like never before, for financial reporting in Excel or Power BI.

GL Analysis: Analyze GL transactions and balances in local currency as well as addition currency for reporting (ACY) for consolidation.

GL Budget: Analyze GL budget and budget variances with well-supported time intelligence and comparisons.

Cost Accounting: Analyze Cost Entries as allocated GL transactions by Account Schedules or Cost Center hierarchy. This module is ideal for top to bottom analysis, leaving all details exposed.

analyze Cash flow (standard BC module) by Source Type, Account and track it down to Forecast document level.

Measure groups are sharing 22 dimensions with 215 attributes in 33 hierarchies.

Financial statements or Account Schedules are defined in Microsoft Dynamics.

It can be used in combination with any of 15 (FO) / 20 (BC) global financial dimensions.

330

Measures

The retail cube comes with **330 measures**, organized into seven measure groups:

POS Sales: Analyze Gross / Net Sales (per Line, M2, Item, Staff, Store and Terminal), Profit and Qty, Basket Value, Store Size, Returns, Tax, and Discounts. Well supported time intelligence with Daily / Weekly / Monthly Sales and many variances (YTD, MTD, WTD, YoY and PoP) of base measures. 89 measure are available in ACY (additional currency).

POS Payments: Analyze payment habits (Net Amount, Average Payment) by Tender Type, Card down to payment line.

POS Batch: Analyze POS events (durations, logons, returns, voids, transactions, returns).

POS Vouchers: Analyze Open amount, Net amount and Applied amount by Created, Applied and Expired Date of Vouchers.

Retail Store Information: Track Store Area M2 (from store information or from store sections) that is used for calculation of averages in other measure groups.

Voided POS Payments: Analyze voided payments.

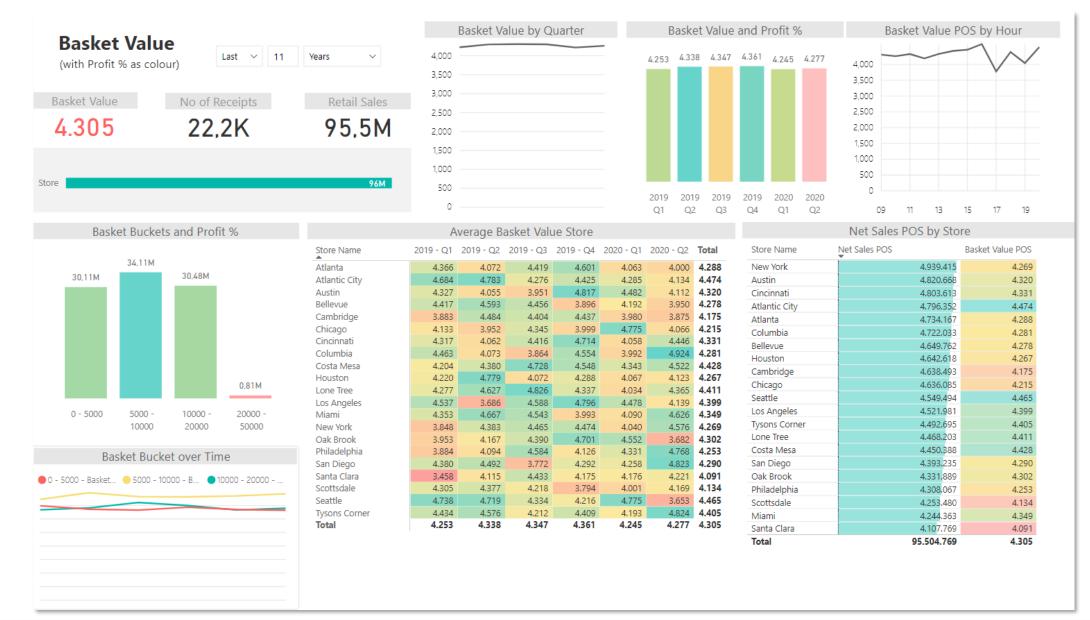

Voided POS Sales: Analyze voided sales transactions.

Measure groups are sharing 41 dimensions with 212 attributes in 38 hierarchies.

Discounted Lines % is one of many operational KPIs that are registred by POS and can be tracked in BI4Dynamics.

MANUFACTURING

The manufacturing cube comes with **36 measures** organized in four measure groups:

Manufacturing: Analyze Input, Output and Work-in-progress of quantities and values across items and capacities. Get the answers to your questions by using the output perspective "how have products been produced over time" or from the input perspective "which *–and where–* items have been consumed in a material capacity" for cost control or product recall.

Manufacturing Expected: Compare expected values (before starting a Production Order) with actuals and for costs and quantities at any level of the production process, thus improving production BOM.

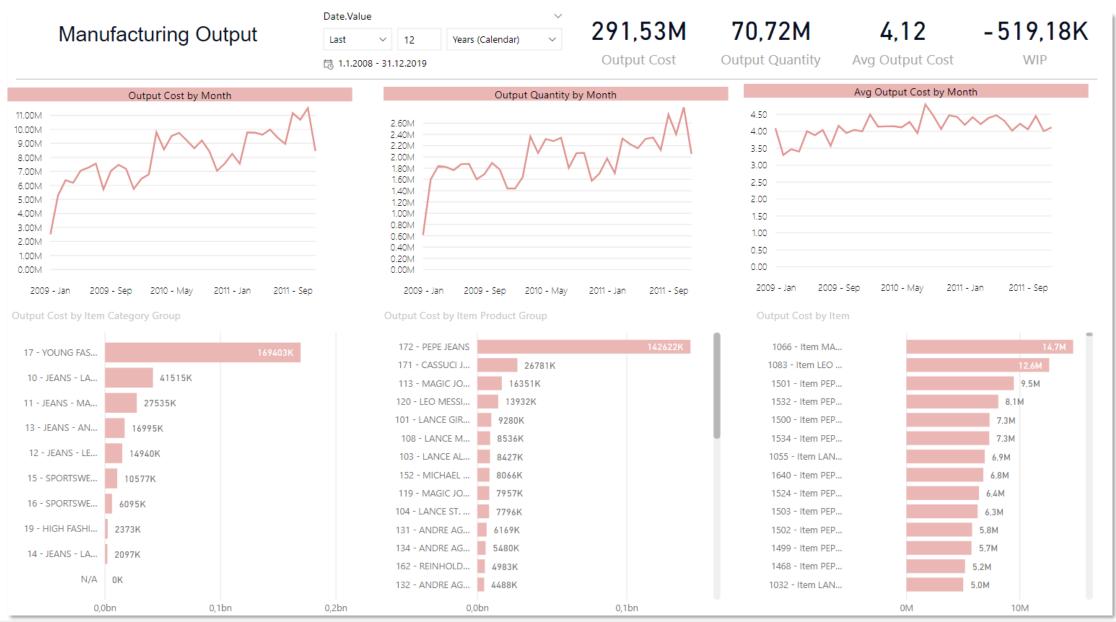

Capacity Calendar: Analyze capacity, actuals and variance of Work Centers group (people, machines)by any BC attribute.

Capacity Times: Run, Setup and Stop Time; also available as a percentage.

Measure groups are sharing 19 dimensions with 166 attributes in 21 hierarchies.

10 Dimensions

PROJECTS

Analyzing Jobs requires flexibility on details. The job cube comes with **249 measures**, organized in three measure groups:

Job Actual: track Sales (Net, Gross, Discounts, Profits) and Hours with Actual and Expected values, with details related to the Item, GL, and Resource.

Job Planning: compare Scheduled and Contracted measures and compare it with Actuals as absolute or relative numbers (% Complete and % Contracted).

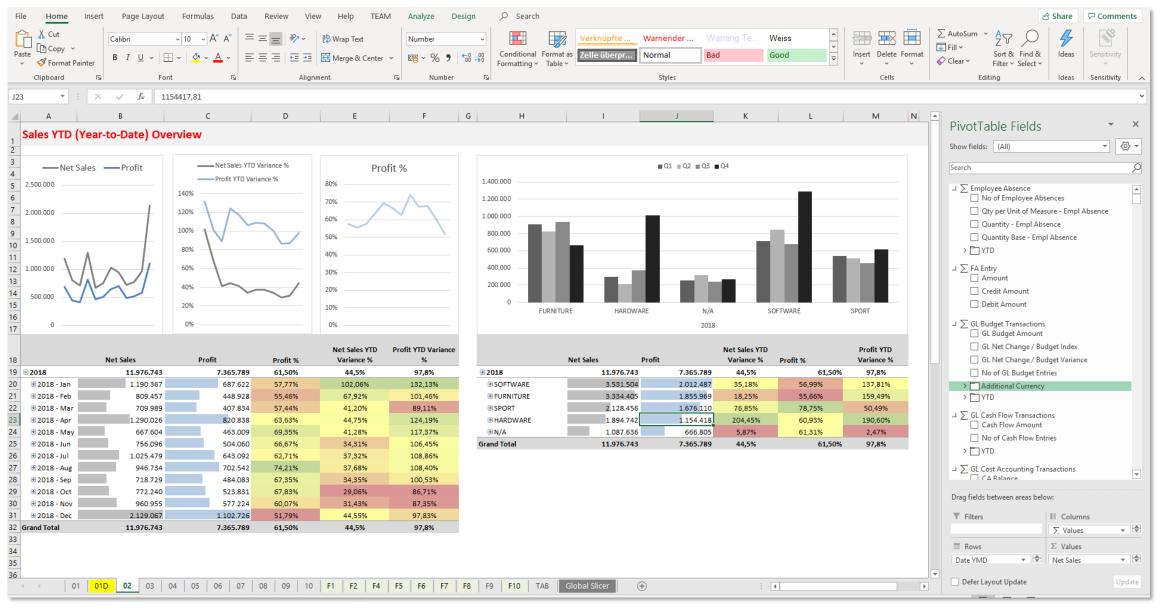

The measure groups share 10 dimensions with 99 attributes in 17 hierarchies.

HOVE WE IMPLEMENT? FISK FREE / MA COUPLE OF DAYS

GUIDED INSTALLATION

We will install BI4Dynamics with all out-of-the-box content in just a couple of hours.

POVER BI 2 * EXCEL

And connect 150 predefined Power BI and Excel reports available for desktop and mobile.

GET INSIGHTS

Feel the power of a ready-to-use BI solution and make fully informed decision.

BI4Dynamics supports 80% of customer requirements. And gaps are covered using the wizard.

BUSINESS INTELLIGENCE FOR MICROSOFT DYNAMICS

GET STARTED WITH A FREE 30-DAY TRIAL
